

Maor Hevron
Web Developer

My primary areas of expertise are no code builders like Bubble.io, Xano, Airtable and Node.js, React, and Vue, but I am always looking to learn and work with new technologies. Recently, I have started exploring new emerging technologies such as OpenAI, Generative AI, and Data Science. I am fascinated by the possibilities that these technologies present, and I am excited to apply my skills and experience to explore them further.

PROFESSIONAL SKILLS

Bubble.io

React.Js/Vue.js

OpenAI

Python

HTML/CSS/JS

JOB EXPERIENCE

Cornerstone / Senior Software Engineer

I worked as a fullstack developer in the Learning Content division. Mostly worked on backend & micro services handling massive loads of traffic. I used proprietary tools and AWS services like Dynamodb, Lambda, SNS, SQS, S3, ECS

February 2019 - March 2022

Finantech / Senior Software Engineer

Using AWS EC2, Lambda, S3, Cloudfront, and many more services. Managing IAM roles, creating EC2 images and docker images, configuring security groups. Designing and developing highly scalable backend infrastructure to process massive traffic. Designing a web application to create, execute, and report different jobs Designing and developing a testing framework Contributing to open source projects under the company

May 2017 - January 2019

FeelCommerce / Software Engineer

I was responsible for designing and developing a web portal for Transportation Services. It connects quality drivers with vehicles, and shippers with quality drivers. They use the stack of React and Flask + Serverless.

2005 - 2013

EDUCATION

Bachelor of Computer Science 2012-2015

Holon Institute of Technology

I have undertaken a comprehensive study in the foundational aspects of computer science, encompassing areas such as databases, algorithms, web infrastructure, and development.
